

Dr. Joseph Karianjahi Njeri

Full-Stack Data Scientist | Backend Developer | Analytics Engineer

Karlsruhe, Germany | +49 163 5155763 | nkarianjahi@gmail.com

github.com/karianjahi | karianjahi.github.io/personal-portfolio

Professional Summary

Software engineer and data scientist holding a Ph.D. (Dr. rer. nat.) with multi-year experience designing and building AI-driven analytics platforms, scalable backend APIs, and machine learning pipelines. Expert at bridging the gap between complex data analysis (Python, pandas, scikit-learn) and robust web infrastructure (Django, PostgreSQL, REST APIs).

Core Competencies

Backend & APIs:	Python, Django, Django REST Framework, REST APIs, Gunicorn
Data Science:	pandas, NumPy, scikit-learn, Machine Learning, Statistical Modeling
Databases & Ops:	PostgreSQL, SQL, Data Modeling, Docker, Git, CI/CD Concepts
Frontend:	JavaScript, HTML5, CSS3, Chart.js, Responsive Dashboards
Cloud & Deployment:	Railway, Render, Linux, AWS Fundamentals, WhiteNoise

Professional Experience

08/2025 – Present	Freelance Full-Stack Developer & Data Scientist Self-Employed, Karlsruhe, Germany • Conceptualized and developed full-stack Business Intelligence (BI) and analytics applications. • Architected SaaS platforms for customer KPI reporting and predictive churn-risk analysis. • Implemented complex data aggregation features and automated reporting workflows.
11/2021 – 07/2025	Data Science & Software Engineering Coach Spiced Academy / neuefische GmbH, Berlin, Germany • Trained and mentored aspiring developers and data scientists in modern tech stacks. • Taught comprehensive modules on Python, SQL, Machine Learning, APIs, and system architecture. • Supervised hands-on software engineering capstone projects and cloud deployments.
07/2019 – 06/2021	Data Scientist Engineering Data Intelligence (EDI) GmbH, Karlsruhe, Germany • Developed production-ready analytical pipelines for industrial IoT applications. • Processed, cleaned, and modeled large-scale, heterogeneous datasets. • Engineered and validated complex machine learning predictive models.
05/2016 – 06/2019	Research Associate / Scientific Programmer Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany • Automated data extraction, validation, and parsing of meteorological data using Python. • Maintained, optimized, and administered a relational station database.
01/2013 – 06/2015	Lecturer South Eastern Kenya University, Kenya • Delivered academic lectures in meteorology and environmental sciences; supervised undergraduate research projects.

Technical Projects (Selection)

FleetIQ	AI-Powered Maritime Operations & Intelligence Platform • Focus: Real-time fleet monitoring, telemetry processing, and ML-based vessel risk assessment. • Stack: Django, Django REST Framework, PostgreSQL, pandas, scikit-learn, Chart.js. • Links: GitHub Code Live Application
AppPulse	Customer Analytics SaaS for Jira Vendors • Focus: Robust CSV data import pipelines, automated customer health scoring, and churn prediction models. • Stack: Django, Django REST Framework, PostgreSQL, pandas, scikit-learn, JavaScript. • Links: GitHub Code Live Application
Marketing Analytics	Full-Stack KPI Dashboard • Focus: Validated data uploads, duplicate detection, and live calculation of core metrics (CTR, CPC, ROAS). • Stack: Django, Django REST Framework, PostgreSQL, pandas, Chart.js, Railway. • Links: GitHub Code Live Application

Education

10/2015 – 05/2019	Ph.D. (Dr. rer. nat.) in Meteorology Karlsruhe Institute of Technology (KIT), Germany <i>Dissertation: Synoptic-scale dynamics and modeling of extreme precipitation in Kenya.</i>
06/2021 – 09/2021	Data Science & Machine Learning Bootcamp Spiced Academy, Berlin, Germany
10/2010 – 08/2012	M.Sc. in Meteorology University of Nairobi, Kenya

Languages & Additional Information

Languages:	English (C2 – Native / Full Professional Proficiency) German (B1/B2 – Upper-Intermediate) Swahili (Native)
Awards:	DAAD Doctoral Scholarship (German Academic Exchange Service)
Interests:	Cloud Architecture, MLOps, System Design, Open-Source Contributions
